FUN FACTS!

Monarch Butterfly

Did You Know?

The annual migration of North America's monarch butterfly is a unique and amazing phenomenon. The monarch is the only butterfly known to make a two-way migration as birds do. Monarch butterflies can travel between 50-100 miles a day. The farthest ranging monarch butterfly recorded traveled 265 miles in just one day!
 ~United States Department of Agriculture

10 Fascinating Facts About Butterflies

- Butterfly wings are transparent
- Butterflies taste with their feet
- Butterflies live on an all-liquid diet
- A butterfly must assemble its proboscis as soon as it emerges from the chrysalis
- Butterflies drink from mud puddles

SPACEX ROCKET LAUNCHES

Rocket Launch: NET January 18, 2020 TBD SpaceX Falcon 9 Commercial Crew In-Flight Abort Test (UNCREWED)

When: NET January 18, 2020 TBD
 Where: Kennedy Space Center LC-39A

MISSION

The test of SpaceX's Falcon 9 rocket and Crew Dragon spacecraft will launch from Launch Complex 39A at Kennedy Space Center. SpaceX will configure the spacecraft to trigger a launch escape shortly after liftoff and demonstrate Crew Dragon's capability to safely separate from the rocket in the unlikely event of an in-flight emergency. It will also provide data to help NASA certify SpaceX's crew transportation system for carrying astronauts to and from the International Space Station.

This in-flight abort test is a one of the final tests required to complete before astronauts can fly aboard the spacecraft.

Rocket Launch: February 5, 2020 11:15 PM EST ULA Atlas V Solar Orbiter

When: Feb 05, 2020 11:15 PM
 Where: Cape Canaveral Air Force Station SLC-41

MISSION

Solar Orbiter, a joint mission of NASA and the European Space Agency (ESA), will study the sun. The mission seeks to answer questions like how the sun is able to create and control its heliosphere, the surrounding bubble of magnetic fields. Solar Orbiter will orbit the sun, nearing as close as 26 million miles away from the star. After launch, it will take 3 years to reach this elliptical orbit around the sun.
